ALUMINUM FOAM

OPEN CELL ALUMINUM FOAM

Open-holealuminiumfoam has excellent soundabsorption and fire resistance, good light transmission, high strength, suitable for starry sky ceilings, fluorescent walls, home interior installations, and other scenes.

Specification: Density 0.2-8 g/cm, Pores Size 3-7 mm

Key Benefit: Lightweight, Durable, Eco-friendly

Aesthetic Option: Natural, Anodised, Paintable, and Textured Finishes

Applications: Wall Panels, Ceilings, Facades

Size: 1000 mm * 2000 mm

ALUMINIUM PROFILE

ALUMINIUM PROFILE

Aluminium profiles are the perfect blend of strength, elegance, and versatility, designed to enhance modern interior spaces with a clean and contemporary finish.

- Specification:** Hardness Scratch-resistant
- Key Benefit:** Lightweight, Durable, Eco-friendly
- Aesthetic Option:** Natural, Anodised, Paintable, and Textured Finishes
- Applications:** Wall Cladding, Partitions
- Size:** Length standard 6 Mtr. and Customizable

CRYSTAL BRICK

Premium Designer Crystal Bricks

Designed for high-end interiors, crystal bricks create a stunning play of light and elegance, adding depth, sophistication, and architectural beauty to any space.

Specification: Translucent, Solid and Decorative.

Key Benefit: Aesthetic Appeal, Durable, Energy Efficient

Aesthetic Option: Translucent, Textured, Dynamic Lighting

Applications: Partitions

Size: 50 mm * 100 mm * 200 mm / 23 mm *

MODIFIED CLAY

Refined Architectural Surfaces

Alightweight,flexible,and sustainable architectural finish made from natural clay and polymers, designed to mimic natural textures like stone, wood, and brick for both interior and exterior use.

Specification: Smooth and Heavy

Key Benefit: Eco-friendly, Durable, Low maintenance

Aesthetic Option: Diverse textures (Matte, glossy), Fits various styles

Applications: Custom furniture, Well enhancements, Countertops, Outdoor decor

Size: 9*3 ft and 8*4 ft

RESIN DECORATIVE PANEL

TBSZ01

TBSZ02

TBSZ03

TBSZ04

TBSZ05

Designer Resin Wall Solutions

Resin decorative panels create a striking visual statement, blending artistic depth, luminous textures, and premium craftsmanship to elevate contemporary interiors.

Specification: Thickness 4-5mm

Key Benefit: Durable, Eco-friendly, and Low Maintenance

Aesthetic Option: Various finishes (Brushed, Polished, Matte), Modern and sleek look

Applications: Partition

Size: 1220 mm * 2440 mm

STAINLESS SHEET

Refined Architectural Surfaces

for architectural uses like wall cladding, ceilings, and elevators, offering durability, aesthetics, and eco-friendliness.

Specification: Textured | Reflective

Key Benefit: Eco-friendly, Durable, Low maintenance

Aesthetic Option: Various Finished (brushed, Polished, Matte) Modern and Sleek Look

Applications: Feature walls, Bar fronts, Elevator Interior, Decorative art panels

Size: 8' by 4' ft.

ULTRA THIN STONE

Refined Architectural Surfaces

often with a natural stone layer (slate, marble, sandstone) bonded to a fiberglass/resin backing for flexibility, resulting in lightweight sheets available in large formats for interior/exterior use, focusing on natural look with modern durability

Specification: Translucent, Natural Stone, Lightweight and Flexible.

Key Benefit: Eco-friendly, Durable, Low maintenance

Aesthetic Option: Various colours (White, Cream, Vibrant hues), Unique natural patterns

Applications: Interior decor (Trays, Coasters), Architectural facades, Bathrooms and spas

Size: 8*4 ft

TRANSPARENT STONE

Refined Architectural Surfaces

Made with 4–10% optical fibers fine concrete, delivering high structural strength while allowing light transmission through internal reflection. provides natural light diffusion for architectural aesthetics, energy saving, and smart structural sensing applications

Specification: Thickness 20 mm to 30 mm, Light permeability 2% to 10%

Key Benefit: Eco-friendly, durable, and Versatile for various applications

Aesthetic Option: unique glowing effect, Available in different stone types

Applications: Interior design (Backlit panels), Countertops and bars, Feature walls

Size: 4*2 ft

CERAMIC FOAM BRICKS

Refined Architectural Surfaces

Fired at 1200°C , honeycomb closed hole technology, the product volume weight 400kg/m^3 , is 1/6 weight of cement shaped brick.

Fireproof and waterproof

Class A1 fire resistant, unique closed hole construction, completely waterproof..

Specification: Surface colouring process, spraying, brushing, etc

Key Benefit: Eco-friendly, Durable, Low maintenance

Aesthetic Option: Wide range of colours.

Applications: Partition

Size: $195 \times 195 \times 100\text{mm}$

JAPANESE PAPER & PANEL

Refined Architectural Surfaces

Premium PVC decorative film with paper-texture finish, offering scratch resistance, moisture protection and long-lasting color stability. ideal for furniture, doors, wall panels and modular interiors to give a soft matte natural paper-stone look

Specification: Paper-Texture | Moisture-Proof | Scratch-Resistant | Color-Stable

Key Benefit: Eco-friendly, Durable

Aesthetic Option: Available in various colours and textures

Applications: Wall covering

Size: 8*4 ft Panel size and 30 m Roll

CEMENT BOARD

Refined Architectural Surfaces

Cement boards bring a refined architectural character to spaces, combining raw elegance, modern texture, and long-lasting performance for premium interior and exterior applications.

Specification: Smooth and Heavy

Key Benefit: Durable, Moisture/Fire/Mould resistant

Aesthetic Option: Paintable

Applications: Walls Cladding, Countertops

Size: 8 ft * 4 ft, Easy to install

PRINTED MODIFIED CLAY

Refined Architectural Surfaces

3DFlexibleStone Panelismade from carefullyselected natural recycled materials, modified and reshaped through advanced technology.It is tough, scratch-resistant and flexible, integrating multiple protective functions to adapt to changing environments.

Specification: Moldable and Paintable.

Key Benefit: Eco-friendly, Durable

Aesthetic Option: Available in various colours and textures

Applications: Wall covering

Size: 4*2 ft
