XTERIA

Exterior Grade
Wall Panels

Introducing PARÉ XTERIA

As architecture continues to evolve, so do the expectations from exterior materials — they need to look stunning, last long, and handle all kinds of weather. That's exactly why we created **PARÉ XTERIA** — a fresh range of exterior-grade wall panels designed to bring together beauty, strength, and performance.

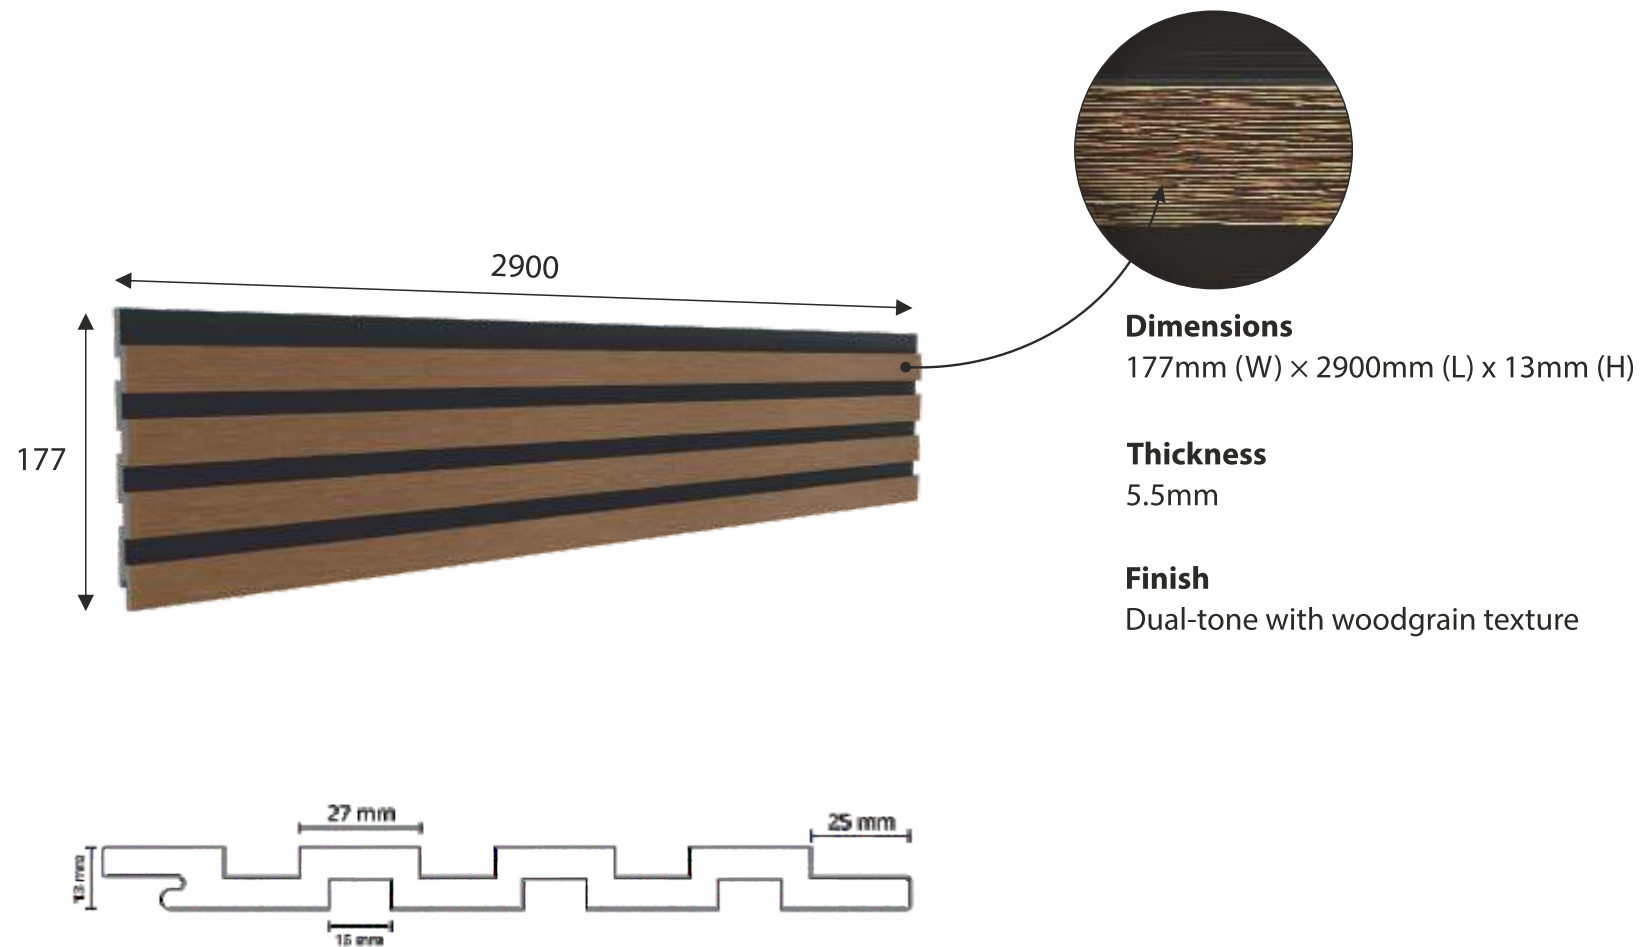

At **PARÉ**, we see exterior walls not just as structures — but as spaces to create something meaningful. With **Xteria**, we invite architects, designers, and visionaries to explore new possibilities.

At the heart of this range is our first product, **XTERIA SLIM**

X T E R I A SLIM

A sleek, durable panel that's built to transform the way exterior spaces look and feel.

Available Shades

Forest Maple

Beige Oak

Golden Teak

Silver Oak

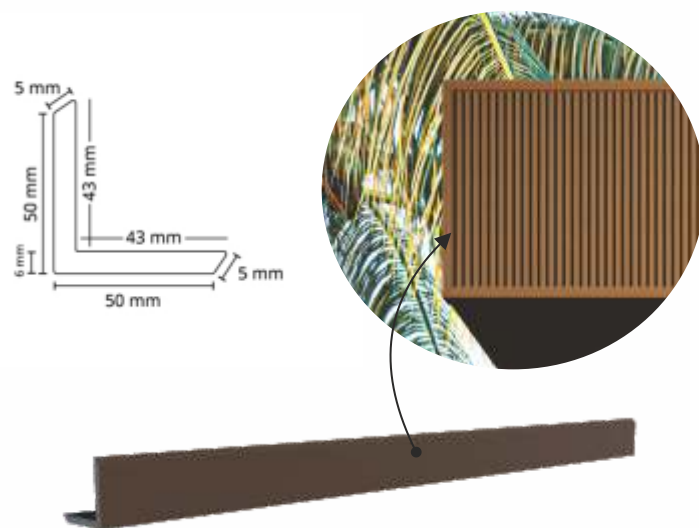

Rose Walnut

*Shade may slightly differ from shown images.

Xteria L Profile | 50mm x 50mm

The finishing touch your Xteria panels deserve. Our L Profile neatly wraps around all the edges - from the perimeter to inside and outside corners - giving your walls a clean, polished look.

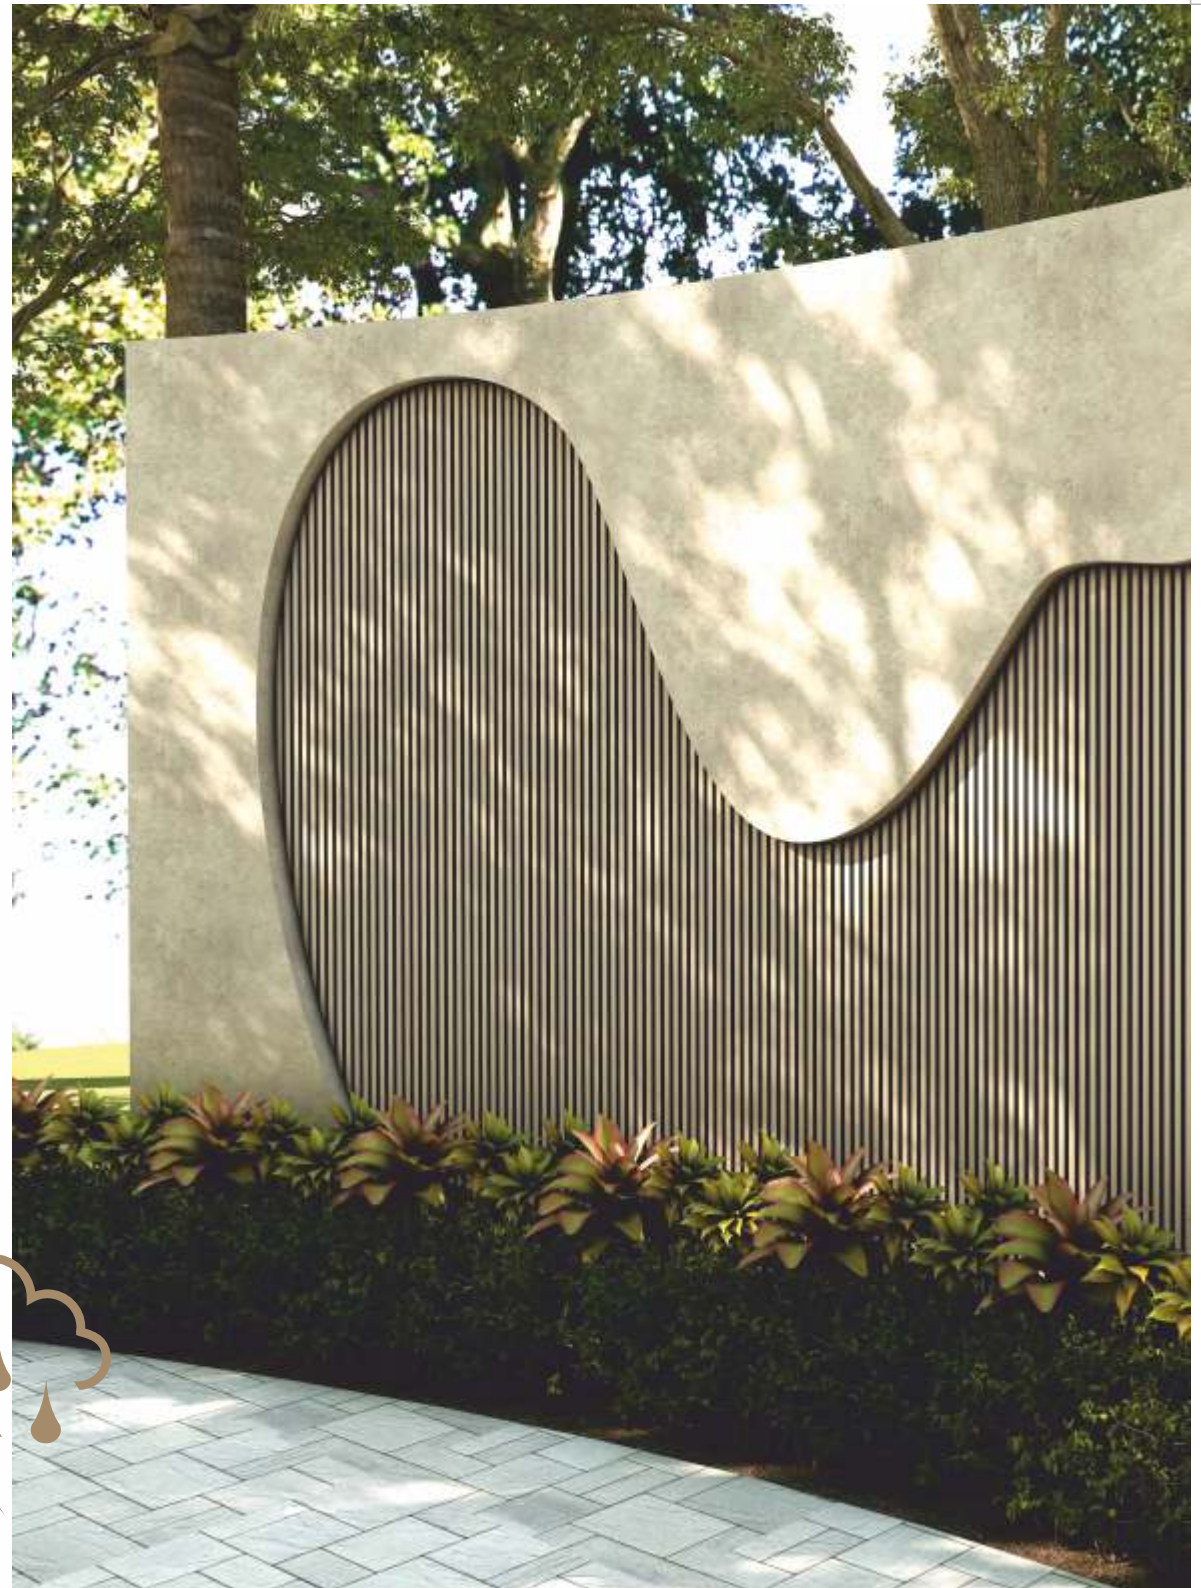

Xteria Clip

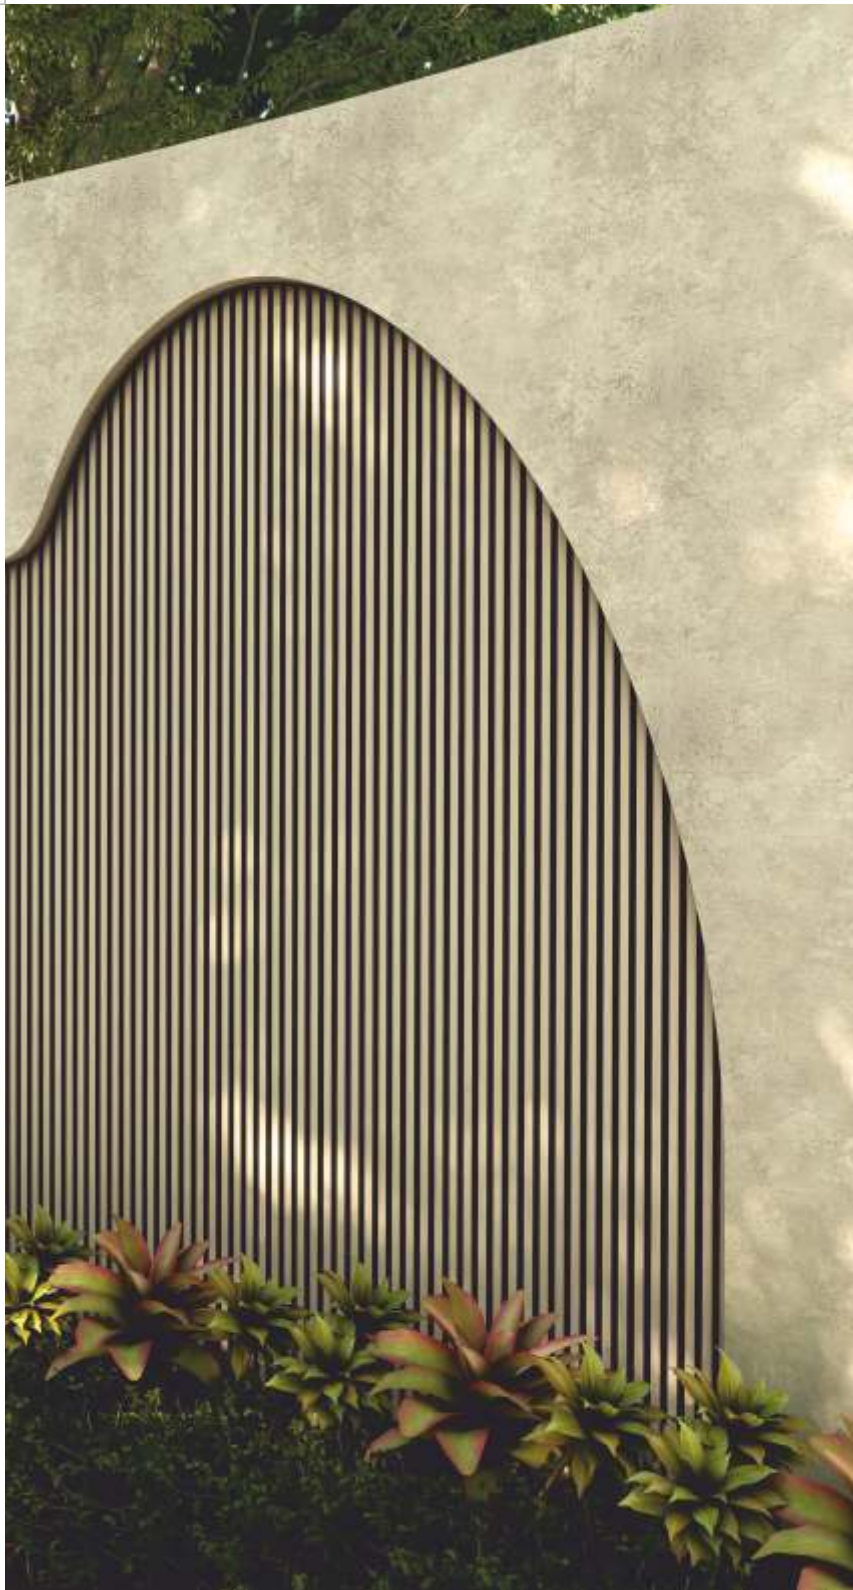

Xteria Clips fit between panels to ensure firm grip and even spacing, enabling quick, precise, and seamless installation without visible screws.

Design that Brings Architecture to Life

With rich, earthy hues and elegant greys, Xteria Slim captures the natural beauty of wood - but with the strength and reliability of advanced engineering. Its dual-tone finish adds depth and character to any space, blending timeless design with modern innovation. It's where nature meets next-gen materials, creating exteriors that are as stunning as they are strong.
